

Mission Critical Facilities

Growth

Every business strives for it. With new technologies and globalization propelling businesses in to new markets and new opportunities, rapid growth often overlooks an organizations ability to support the processes and applications required to serve new clients and new opportunities. Information technologists are often under the gun to support their companies by making tactical decisions to disarm immediate challenges as opposed to taking a longer view at facilities and infrastructure, designed and implemented in a thoughtful way to support today and tomorrow.

The FDI Solution

At FDI Consulting, our consultants understand the challenges facing operations and technology executives. Our staff has designed, built, and managed state of the art network and data center facilities. Not only have we faced the real time challenges in our experiences, but because we've helped companies just like yours address risk, threats, and vulnerabilities in their technology and facility infrastructure with knowledgeable professionals experienced in data center design and management, operational risk assessment, and continuity of operations planning. From network closets to secured mission critical data centers, FDI Consulting can help you determine a best of breed approach to serve your business operations demanding needs.

Mission Critical Facilities

FDI's Mission Critical Facilities Services include:

Whether fortifying your existing environment or engineering redundant facilities in to your existing network, FDI Consulting can assist your organization in assessing your present facilities. From recommending mitigation strategies to combat identified threats to analyzing return on investment alternatives to your existing assets including facility upgrades to fully-managed outsource provider alternatives, FDI Consulting is here to help. Our services include:

- Operational Risk Assessments
- Facility Vulnerability Assessments
- Mission Critical Facility Consulting
 - Facility Analysis
 - Network Engineering
- Security Analysis

Why choose FDI?

- FDI understands that in today's economy not all companies can afford to build "always available" facilities. We work with each client to assist them in defining true operating requirements for their mission critical facilities that are aligned with their financial and operating requirements.
- FDI's professionals understand the balance and compromises that are involved with functionality vs. cost. We work with our clients to assure them of maximized functionality vs. cost equation end result.
- FDI has a proven track record of satisfied clients and success stories.
